

SHREYA SUMAN

.NET Developer | 3.5 Years Experience | Open to Remote Worldwide

Sumanshreya000@gmail.com • +91-9311572717 • [LinkedIn](#) • [Portfolio](#) • [HackerRank](#) • Remote-Ready

PROFESSIONAL SUMMARY

Results-driven .NET Developer with 3.5 years of experience designing and delivering scalable back-end services, enterprise APIs, and full-stack web applications. Deep expertise in .NET Core, ASP.NET MVC, C#, SQL Server, Azure DevOps, and Angular. Demonstrated track record of measurable outcomes — cutting report latency 40%, automating 90% of manual data pipelines, and eliminating 30 hrs/week of manual grading. Experienced in Agile/Scrum teams with strong async communication skills and self-directed delivery. Comfortable collaborating across time zones and well-suited for remote-first, globally distributed engineering teams.

TECHNICAL SKILLS

Languages	C#, JavaScript, SQL, Java,php
Back-End	.NET Core 6/8, ASP.NET MVC, Web API, REST APIs, Microservices, Webforms
Front-End	Angular, HTML5, CSS3, jQuery, JavaScript
Databases	MS SQL Server, MySQL, MongoDB, Redis — LINQ, Stored Procedures, SSIS / ETL
Cloud & DevOps	Microsoft Azure Services, Azure DevOps, CI/CD Pipelines
Frameworks	Entity Framework Core, Swagger, OOP Design Patterns
Tools	Git, GitHub, Postman, Visual Studio, VS Code
Soft Skills	Async Remote Collaboration, Code Reviews, Agile/Scrum, Documentation, Cross-TZ Teamwork

PROFESSIONAL EXPERIENCE

Software Developer | Radius Global Solutions

June 2025 – Present | Remote

Stack: WinForms, .NET Framework, SQL Server, C#

- ▶ Built and enhanced a WinForms + .NET Framework call-training simulator allowing agents to practice real-time call-handling scenarios in a controlled, risk-free environment.
- ▶ Integrated automated assessment tools into existing .NET training applications, eliminating 30 hrs/week of manual grading and improving overall training efficiency by 20%.
- ▶ Collaborated asynchronously with trainers and stakeholders to iterate on simulator features against evolving training curricula, reducing new-agent onboarding time.
- ▶ Upheld code quality through structured Git PR reviews, inline documentation, and Agile sprint ceremonies conducted fully via remote collaboration tools.

Full-Stack .NET Developer | Isango Travel Pvt. Ltd.

Feb 2023 – June 2025

Stack: .NET Core 6, ASP.NET MVC, MS SQL Server, Angular, Azure DevOps, Entity Framework Core, LINQ, jQuery, Microservices Architecture

- ▶ Engineered a custom C# + SQL Server reporting tool to replace SSRS, reducing report generation latency by 40% and aligning reporting capabilities with modern analytics needs.
- ▶ Designed modular ASP.NET MVC applications using Microservices Architecture, enabling independent deployment of critical components and significantly reducing release risk.
- ▶ Implemented an SSIS-based ETL pipeline to automate cross-department data integration, eliminating 90% of manual data processing and establishing a reliable, scalable data workflow.
- ▶ Led Angular front-end development alongside .NET Core Web API services, accelerating project delivery by 20% through effective cross-functional coordination.

- Configured Azure DevOps CI/CD pipelines for automated build-test-deploy cycles across staging and production, improving release cadence and reducing deployment errors.
- Conducted regular code reviews, enforced OOP design patterns and SOLID principles, and contributed to team knowledge-sharing sessions to maintain engineering standards.

KEY PROJECTS

Custom SSRS Replacement — C# Reporting Tool

- Standalone reporting tool built in C# and SQL Server to replace SQL Server Reporting Services, delivering 40% faster report generation and enhanced data visualization for the analytics team.

SSIS-Based ETL Data Integration Pipeline

- Automated cross-department data ingestion and transformation using SSIS, reducing manual data tasks by 90% and establishing a reliable, audit-friendly ETL workflow.

Agent Call-Training Learning Simulator

- WinForms-based simulator enabling agents to rehearse real-time call scenarios before going live, improving onboarding effectiveness and measurably reducing time-to-productivity.

EDUCATION

B.Tech, Computer Science

Aug 2020 – May 2023

SGPA: 8.5 / 10.0 — Strong foundation in algorithms, data structures, OOP, and software engineering.

REMOTE WORK READINESS

- Available to work across US (EST/PST), EU (CET/GMT), APAC, and other time zones with flexible scheduling.
- Proficient in async-first workflows: written specs, PR-driven development, Jira/Azure Boards task tracking, and Confluence-style documentation.
- Comfortable in distributed Agile teams using video standups, async retrospectives, and collaborative code review via GitHub/Azure DevOps.
- Self-directed and outcome-focused — able to deliver independently with minimal supervision in remote-first environments.
